Grossman talks about education

By Bruce Anselmi

When an increased post-secondary education level is required, and a more efficient use of funds is required, the Ontario Government has a responsibility to provide a more efficient post-secondary education system.

Responsibility I have to say that is the only reason for funding is the taxpayer, and the money to provide it. I have a small part and the ability to give the system the money to provide a more efficient post-secondary education system. It is not a responsibility to provide a more efficient post-secondary education system. It is not a responsibility to provide a more efficient post-secondary education system.

A representative of Conestoga College said the college had received an increase in its liability insurance when it came for renewal.

The increased premiums would really hurt the college, considering that the college was receiving those insurance before. The college said it would also have to increase its charges to the students.

Telecommunications has close to 100% placement rate

By Yvette Campbell

Hands on learning and being able to work at your own pace are two major factors that attract students to the three-year telecommunication program.

Nancy McCosnell, coordinator of the program, said placement rates for the program are close to a 100 per cent.

The program is designed for students who are self-motivated and who are able to work at their own pace.

McCosnell said the average starting salary was between \$10,000 and \$12,000.

The program is a three-year program with a total of 120 credits. Students can take up to 12 credits per semester.

Abstract: The authors examined the effects of a 12-week, 100% body weight (BW) resistance training program on the muscle strength, muscle mass, and body composition of 10 sedentary, middle-aged men. The subjects were randomly assigned to either a control group or a resistance training group. The resistance training group performed a 12-week, 100% BW resistance training program. The control group performed no resistance training. The resistance training group showed significant increases in muscle strength, muscle mass, and body composition. The control group showed no significant changes. The results suggest that a 12-week, 100% BW resistance training program can improve muscle strength, muscle mass, and body composition in sedentary, middle-aged men.
